DROUGHT OR EVERY-OTHER-DAY WATERING SCHEDULE

Suggested watering schedule for drought, or every-other-day watering, **ONLY IF REQUIRED!**

1. Per the watering instructions on the LawnSaver bag, we recommend watering **DAILY**. If, due to a drought, or when watering every-other-day is **REQUIRED**, please follow the following watering schedule. However, **ONLY FOLLOW THIS SCHEDULE IF EVERY-OTHER-DAY WATERING IS REQUIRED!** Daily watering is much more effective with LawnSaver, but this modified schedule for every-other-day watering will also work just fine.

2. Set your sprinkler watering clock as follows:

- Set **WATERING DAYS** to **even or odd days** (calendar numbers) for **PROGRAM A** and **PROGRAM B** according to city guidelines for drought or every-other-day watering.
- NOTE: on most **7-day sprinkler watering clocks**, the 31st of any month and Feb. 29th are always "off" days, if ODD watering days are selected. Be sure to **manually** water your lawn at the end of **July and August on the 31st at 6:00 PM**, or **manually** water **July and August 30th at 6:00 PM** if EVEN watering days are selected, as there will be 2 days in between watering.
- Another option is to use a 14-day sprinkler watering clock, which waters in 14-day cycles, and eliminates end of the month "off" days.
- Set **PROGRAM A** to start watering at **12:00 AM**. Then set **PROGRAM B** to start watering at **6:00 PM**.
- Set watering **RUN TIMES** per the instructions on the LawnSaver bag, with same run times for both PROGRAM A and PROGRAM B. Even though you will be watering smaller amounts twice every other day, this will still give your lawn time to dry out in between these two watering cycles.
- The following is a calendar example to help you see how your lawn should be watered using the above settings (for EVEN & ODD):
